

State of British Columbia's Coastal Rainforest

Forest Ecosystems at Risk of Species Loss

Ecosystems with < 30 %
Old Forest (High Risk of
Species Loss)

Ecosystems with between
30% and 70% Old Forest

Ecosystems with > 70%
Old Forest

Urban or Agricultural

Ecosystem assessment of the 4 regions shown is based
on Biogeoclimatic Subzone Variant by Site Quality.

Productivity for 8% of the forest shown in this map
is unknown. However most of these areas are in the
highly productive Douglas fir region of Vancouver
Island and therefore are included in this map.
